

WealthLens Portfolio Risk Assessment - April 2026

Portfolio Summary

Total Assets Under Management: \$2.47 billion across 8 primary positions. Portfolio risk score: 6.8/10 (Moderate-High). YTD return: +11.4% vs benchmark +8.1%. Portfolio beta: 1.12. Annualized volatility: 14.2%. Sharpe ratio: 1.42. Sortino ratio: 1.78.

Value at Risk Analysis

1-Day VaR at 95% confidence: -\$18.3 million (-0.74% of AUM). 1-Day VaR at 99% confidence: -\$26.1 million (-1.06% of AUM). Expected Shortfall (CVaR) at 95%: -\$32.7 million. 10-Day VaR at 99% (Basel III): -\$82.5 million. Monte Carlo simulation (5,000 paths) confirms parametric VaR estimates within 3% tolerance.

Risk Factor Decomposition

Market Risk: 7.8/10 - Elevated equity exposure (Technology 26.6%) drives market beta. Credit Risk: 5.2/10 - Investment grade fixed income holdings (TLT 8.7% weight). Liquidity Risk: 3.8/10 - 94% of portfolio in liquid exchange-traded securities. Concentration Risk: 7.0/10 - Top 3 positions (MSFT 14.2%, BLK 11.8%, JPM 10.5%) = 36.5% of AUM. ESG Score: 6.2/10 - Weighted average ESG rating of BBB across portfolio.

Top Holdings

MSFT (14.2%, \$351M): High risk, Hold signal. Azure growth slowdown flagged as key risk. BLK (11.8%, \$291M): Medium risk, Buy signal. Record AUM inflows support upside. JPM (10.5%, \$260M): Medium risk, Buy signal. Strong capital ratios and dividend growth. GS (9.3%, \$230M): High risk, Hold signal. M&A pipeline acceleration is positive catalyst. TLT (8.7%, \$215M): Low risk, Buy signal. Rate cut expectations support duration exposure.

Stress Test Results

2008 Financial Crisis scenario: Estimated portfolio drawdown -34.2%. COVID-19 March 2020 scenario: Estimated portfolio drawdown -28.7%. Rising rates +200bps scenario: Estimated impact -6.4% (fixed income drag). Tech sector correction -30% scenario: Estimated impact -8.0% (26.6% tech weight). All stress scenarios show portfolio recovery within 18 months based on historical precedent.
